

Procurement Policy

It is the objective of the School to provide equal educational opportunities for all Students within the School. Therefore, it is the intent of the School to study Federal legislation to enhance the educational opportunities, the educational environment, and the physical and mental growth for each Student.

The director/principal shall review new Federal and State education legislation and prepare proposals for programs s/he deems would be of aid to the students of the school. The director/principal shall approve each such proposal prior to its submission, and the Board shall approve all grants resulting from such proposals.

The Board regards available Federal and State funds of aid to local school districts and communities as a public trust. It forbids the use of such Federal and State monies for partisan political activities and for any use that would not be in accord with Federal or State guidelines on discrimination. The director/principal shall ensure that each draw of Federal monies is as close as administratively feasible to the related program expenditures. For major contracts over \$25,000 at least three bids are supposed to be acquired. The most reasonable one, not necessarily the lowest one, will be chosen. The bid documents will be kept in file.

In spending Federal Funds, the School will comply with the requirements of OBM 2 C.F.R. 200.318 through 200.326.
